

ibot PMD

The Sure Thing

- ✓✓ 4-Wheel Mode: terrain confidence (woods, beach, city).
- ✓✓ Balance Mode: equal contact at eye level.
- ✓✓ Fully configurable seating.
- ✓✓ Climb stairs assisted or independently.

The ibot PMD balance wheelchair is for those who value everyday ease and still want to get out there, no matter the limitations. You steer by joystick, switch to Stair Mode when needed, ride in 4-Wheel Mode across forest paths, beach and curbs, and choose eye level when equal contact feels right. In Balance Mode the ibot PMD can feel especially comfortable for people who live with ongoing pain. It suits everyone who loves being out as well as the person who mainly wants to keep doing everything comfortably at home and around town—indoors and outdoors, weekdays and weekends.
